Stonebridge Ranch Breaks Ground on Signature Beach Club Amenity

McKinney, Texas – The Stonebridge Ranch Community Association (SRCA) officially broke ground on its highly anticipated Beach Club Project on Tuesday, April 28, 2026, marking a major milestone in the continued enhancement of one of North Texas' premier master-planned communities.

Held on site at 6201 Virginia Parkway, the ceremony brought together SRCA Board Members, project partners, and City of McKinney leadership to celebrate the start of construction on what will become a signature recreational destination for residents.

The program began with opening remarks from SRCA Board President **Jon Dell'Antonia**, followed by comments from Beach Club Project Manager and Board Director **Bob Edgar**. Mayor **Bill Cox** concluded the speaking program with remarks reflecting on both the history and future of the Beach Club.

"We are assembled here today at this groundbreaking ceremony to begin the construction of a new modern version of the original Beach Club," said Dell'Antonia. "This new version should serve as the new signature feature for Stonebridge Ranch for the next 35 years for families to enjoy."

Edgar emphasized the project's focus on enhancing the family experience: "We're making this even more family friendly than before with the addition of the separate children's pool, more playground equipment for kids, more picnic areas, fire pits, and a number of other features that will bring this all together into a great pool environment."

Mayor Cox shared a personal connection to the amenity, noting, "We are Stonebridge residents and have enjoyed birthday parties here with our kids, so I can speak first-hand of what it used to be, and I look forward to what it *will* be."

Following the remarks, core members of the Beach Club Project Team grabbed some shovels (provided by Millis) and joined the Mayor for a ceremonial groundbreaking, officially marking the start of construction.

The new Beach Club is designed to build upon the legacy of the original amenity while introducing modern features and expanded spaces for recreation, gathering, and year-round enjoyment. Planned enhancements include a resort-style pool environment with a beach-entry design, dedicated children's areas, additional shaded seating, picnic spaces, fire pits, upgraded facilities, and improved accessibility and security features.

The project is being delivered in collaboration with a team of experienced partners, including Millis Construction, Kimley-Horn, Pritchard Associates, Conduit Architecture + Design, and Aqueous Engineering.

Construction is now underway, with the Beach Club anticipated to open in May 2027.
